

Release Notes

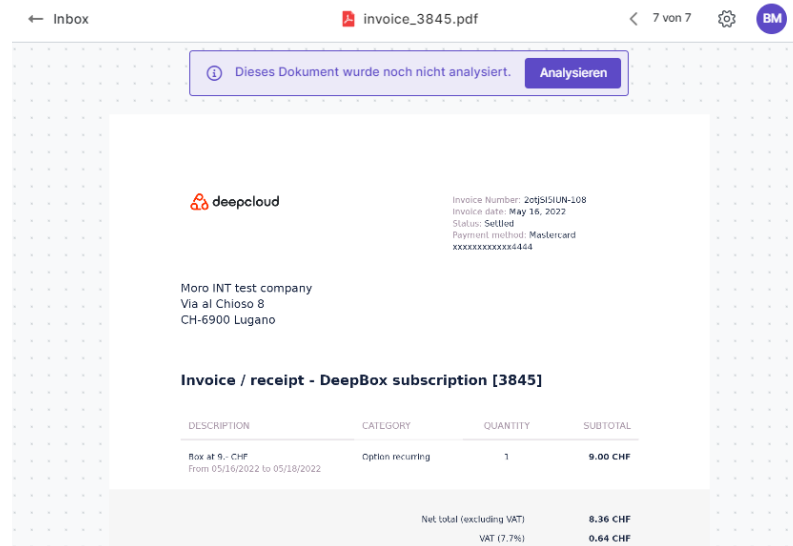

With the release on the 14th of July 2022, extensions and improvements were implemented in the following areas.

Area Details

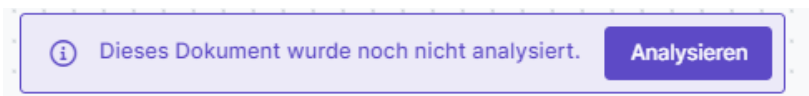

Editor with Abacus Integration

Problem solved: Documents in the Inbox that have never been analysed cannot be analysed without re-uploading them.

With the release on the 30th of June 2022 Simple and Advanced Boxes were introduced. If a Simple Box is changed to an Advanced Box, while documents are already in the Inbox, these documents can now be analysed directly in the frontend without having to re-upload them.

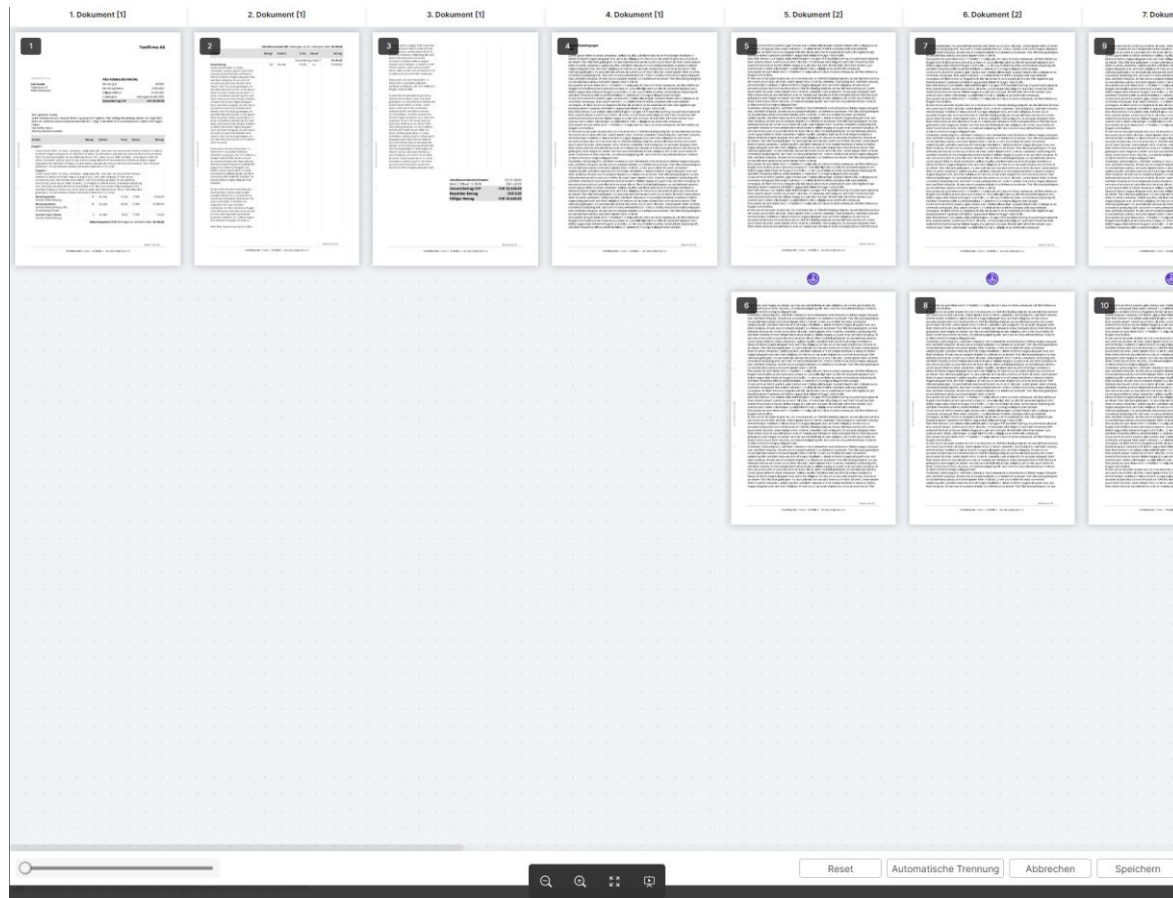

By clicking on the "Analyse" (here "Analysieren") button, the analysis can be done directly from the Frontend:

Editor with Abacus
Integration

Improved horizontal scrolling behaviour when splitting documents.

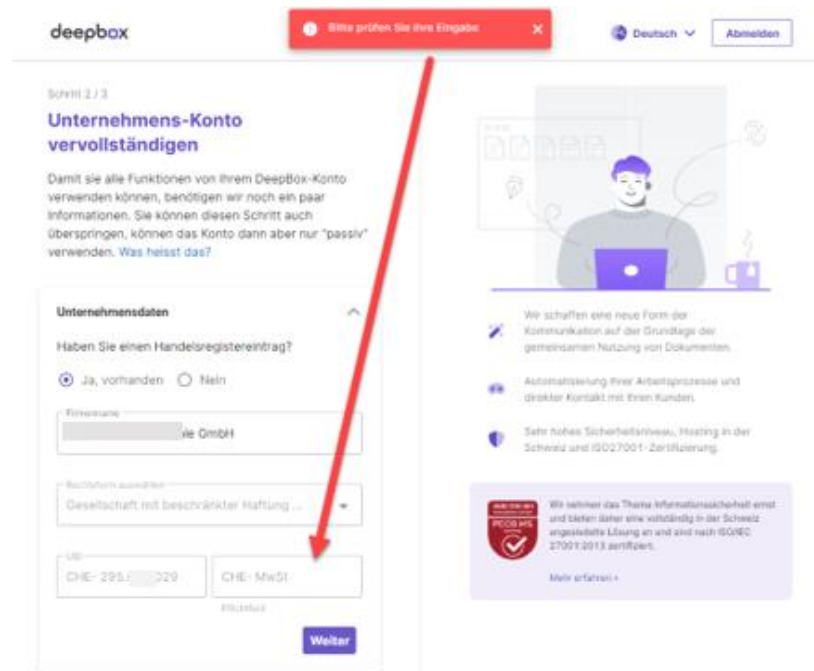

If documents with many pages are split in the editor, the resulting sections are displayed in a more user-friendly view by introducing horizontal scrolling.

Onboarding

Fixed an error where the VAT number could not be processed

With the introduction of the new onboarding, there was a problem when entering the VAT number for companies where the number could not be retrieved automatically. If the value is missing, it can now be edited, should it be mandatory for to the selected legal form.

Optimisation for password managers

Support for the most popular password managers has been further optimised.

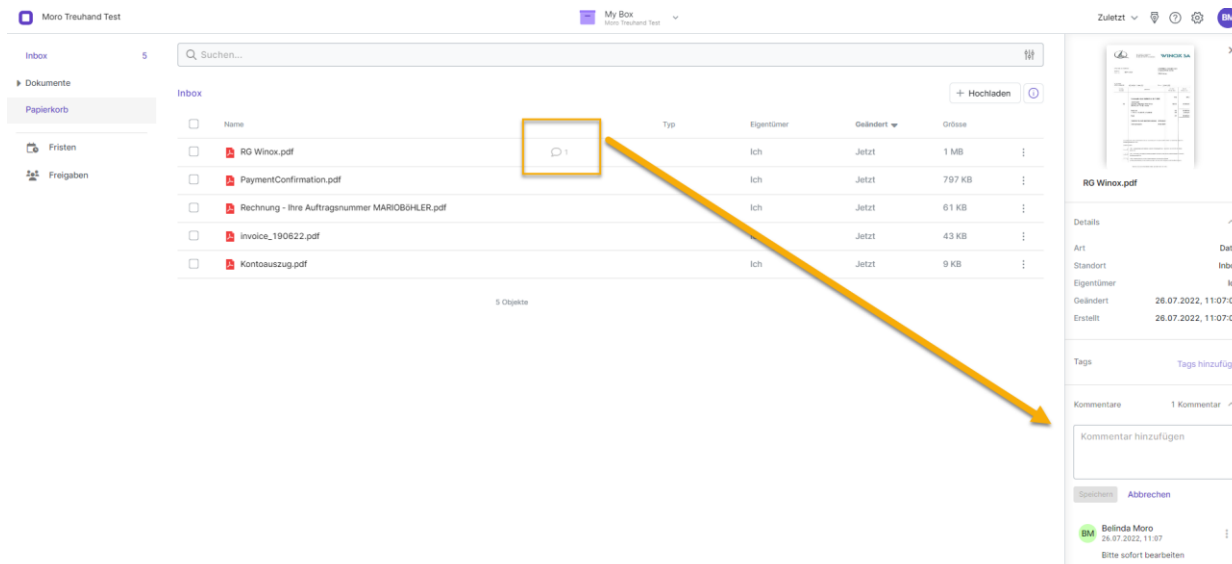

Windows Client

Improvements of the texts within the client set-up

Various texts and pages within the process of the client connection were optimised and adapted to the new onboarding design.

With the release on the 28th of July 2022, extensions and improvements were implemented in the following areas.

Area	Details
Editor with Abacus Integration	<p>Abacus customers: Invoices must be marked as incoming/outgoing. The invoices are then no longer duplicated. The type of invoice (in/out) must now be specified so that the document can be categorised and archived in the correct folder. It is no longer possible to process the invoice, if this was not previously defined. The problem of duplicate saved invoices has been fixed.</p> <p>Various other improvements to DeepO (text recognition):</p> <ul style="list-style-type: none"> • Improve complicated VAT tables for hotel invoices. • Recognition of the document type "offer" (but no fields are supported yet).
DeepBox Frontend	<p>Updated file explorer:</p> <ul style="list-style-type: none"> • New info sidebar with optimised design • General revision and improvement of the user interface • Management of tags and comment function: users can now comment on files (the user needs Edit or Organize rights for this) • Comments from the clients (Windows, Mac, Android & iOS) are also displayed in the frontend.

Area	Details
Onboarding	<p>Restriction of country codes for phone numbers, as not all codes are currently supported by the verification partner YAPEAL</p> <p>Until now, entering phone numbers that are not supported by YAPEAL, resulted in an error. By restricting the selection of area codes, this error can now no longer occur.</p> <p>This is a temporary change until YAPEAL supports all country codes.</p>
Windows Client	<p>Better error handling for logged-in users, trying to connect to the client.</p>
Subscriptions	<p>Various improvements and bug fixes:</p> <ul style="list-style-type: none">• General visual improvements and optimisation of user guidance• The owners of an organisation now receive an e-mail when a chargeable Advanced Box is added.• When storage space is overused, this is displayed more clearly.
